

# SETTING UP APPLICATION ENVIRONMENT

## INSTALL IBM CLOUD CLI

The screenshot shows the IBM Cloud Container Registry 'Quick start' page. The left sidebar contains a navigation menu with the following items: Container Registry, Quick start (selected), Namespaces (0), Repositories (0), Images (0), Trash (0), and Settings. The main content area is titled 'Quick start' and includes a 'Location' dropdown set to 'Global'. Below this, a 'Welcome!' message states: 'Let's get started by installing the needed CLIs, setting up your first private registry namespace, and pushing your first image.' The 'Install, Set Up, and Log In' section lists three steps: 1. Install the IBM Cloud CLI, 2. Install the Docker CLI, and 3. Install the Container Registry plug-in. Step 3 includes a terminal command: `ibmcloud plugin install container-registry -i 'IBM Cloud'`. Step 4, 'Log in to your IBM Cloud account', includes a terminal command: `ibmcloud login -a https://cloud.ibm.com`. A note states: 'If you have a federated ID, use `ibmcloud login --sso` to log in to the IBM Cloud CLI.' Step 5, 'Ensure that you're targeting the correct IBM Cloud Container Registry region.', is partially visible at the bottom. The browser's address bar shows `cloud.ibm.com/registry/start`. The Windows taskbar at the bottom shows the date as 09-11-2022 and the time as 18:51.
